

FOR IMMEDIATE RELEASE

**CONCURRENT AND ORTIKON UNVEIL INTEGRATED  
ON-DEMAND SERVICE PLATFORM**

*Flexible VOD Solution Showcased at IBC in Hall 4, Booth 262*

AMSTERDAM (IBC 2006) - September 8, 2006 - Concurrent (Nasdaq: CCUR), a worldwide leader of on-demand technology that is shaping the future of television, and Ortikon Interactive Ltd. today announced that they have pooled their collective on-demand expertise and integrated Ortikon's comprehensive on-demand service management software with Concurrent's MediaHawk VOD servers to provide a complete, end-to-end Video-on-Demand (VOD) service platform.

"Ortikon's international reputation for developing innovative, flexible and customer-friendly software technology makes them an ideal partner for Concurrent," said Gary Trimm, CEO of Concurrent. "The combination of Concurrent's advanced VOD streaming software and Ortikon's service management software will truly enhance on-demand viewing experience for international audiences."

Viewers today expect top quality content delivered when they want it, forcing service providers to address the demands of smaller and more specific target subscriber groups. Meeting the demand of customers' expectations for more engaging content presented through a simple, user-friendly navigational software interface becomes difficult when coupled with the ongoing challenges service providers face in receiving, storing, managing, distributing, tracking and conducting business around exploding amounts of content.

It's crucial for operators to provide high-quality and reliable on-demand services as content libraries continue to grow substantially. The power to deliver premier on-demand applications is made possible through a complete VOD platform that incorporates innovative software applications for business and content management. Ortikon's and Concurrent's flexible, integrated system technology handles the flow of VOD content from the operator to the subscriber by receiving, storing and delivering video simultaneously over a wide footprint. This system also integrates customer authentication, video scrambling, subscriber and billing system management capabilities through the operator's existing network.

Ortikon and Concurrent showcase their solution at IBC 2006 (RAI Centre, Hall 4, Booth 262) in Amsterdam.
